

***Applications for the Neurodevelopmental T32  
Postdoctoral Research Fellowship Program at  
Boston Children's Hospital are open!  
Deadline is March 31.***

**<https://rsztnc.org/fellowships/>**

**Postdoctoral research fellowships:** Two year fellowships funded by the National Institute of Mental Health (NIMH) are available for MD, PhD, MD/PhD applicants from the fields of psychiatry, psychology, pediatrics, neurology, genetics, neuroscience, developmental biology, computer science and related fields who seek to improve or expand their ability to conduct interdisciplinary-translational research in neurodevelopmental disorders.

Trainees accepted into the postdoctoral training program will work collaboratively with two program mentors (one preclinical and one clinical), who will help to define, enhance and monitor the trainee's research program and career trajectory. The training program also offers various didactic courses and activities (e.g., workshops on research methods and grant writing, journal club and career lunches) to promote professional development.

This program has an outstanding success rate for training postdoctoral fellows who go on to become highly productive independent researchers. Creative, energetic and dedicated candidates are particularly encouraged to apply, as are candidates from backgrounds typically underrepresented in higher education.

Applications should be submitted by **March 31, 2023**, with the expectation that trainees will be selected by **May 16th** and will start in **August, 2023**. Applicants must be U.S. citizens or permanent residents with an MD and/or PhD (must be completed at the time training begins). Commitment to the goals of the program and strong academic and research credentials are important criteria used in the selection process.

For more information about this unique 2-year fellowship, please read the attached Infosheet, or visit <http://www.rsztnc.org/fellowships/>. Further inquiries can be made by reaching out to us directly at [T32Translationaldevelopment@childrens.harvard.edu](mailto:T32Translationaldevelopment@childrens.harvard.edu).
